Question 1

The people that would most benefit from RadiantSkin Co are women between the age groups of 30 - 40's, they have the desire to look younger, while prioritizing self-care and are worried about how they look as they age. In terms of location they live in high end suburbs and estates like Sandton, Fourways and Golf estates, some of the views and values they hold are: see skincare as an investment and an essential, prioritize health, they lean more towards environmental friendly products and for income levels that are more in LSM 8-10 these are affluent individuals that shop at premium retailers, and possess luxury assets.

For interests and Behaviours they are active on social media specifically Instagram, LikedIn, and X they are, also active gym members, have gyms memberships, follow daily routine but use their weekends for hobbies like golfing,tennis, wine tasting and attend exclusive events and they use make-up on a daily basis, follow luxury beauty brands and wellness influencers.

Question 2

I have chosen Instagram as the most suitable social media platform to reach my target audience, because it supports professional visual content, this is where they spend most of their time engaging and scrolling with posts and use this platform for their main account.

Question 3

Now because branding details are unavailable I have designed a typographic logo, tagline, product prototype and advertisement that aligns with the findings and insights above and to achieve the look and feel of the ad I conducted research into luxury brands to have a deep understanding and reference my creative direction. I took note of the tone and wording they use, the kind of imagery used as well as the layout of their websites and products. As a result I created a social media carousel that has 3 slides the first slide visual representation of the starting point of the target audience (common method) they begin by searching a challenge they are facing, next slide is the solution of their search which is the RadiantSkin Co Glabra Advanced Corrector and the last slide is the product prototype as well as the product and ingredients and description.

I made use of AI in the product prototyping see next page

SOCIAL MEDIA CAROUSEL
